

What is BIO-CLEAN?

BIO-CLEAN is a special combination of natural bacteria and enzymes that DIGESTS organic waste found in your plumbing system: grease, hair, soap scum, food particles, paper, cotton ... etc.

BIO-CLEAN will not digest or have any effect on inorganic materials such as plastic pipe. It does not produce heat, fumes or boiling like chemicals do.

BIO-CLEAN is safe for people, plumbing, and the environment.

How does BIO-CLEAN work?

In nature all animal and vegetable matter is broken down and recycled into plant food by enzymes and bacteria. **BIO-CLEAN** uses this same principal to biodegrade organic waste that accumulates in your plumbing system. Like all living things, bacteria must "eat" to survive. Fortunately the grease, hair, soap film and organic waste are food for the bacteria in **BIO-CLEAN**. The enzymes prepare this "food" for the bacteria by breaking down the large molecules into a size the bacteria can "swallow".

When mixed with water, **BIO-CLEAN** immediately goes to work! The enzymes are very fast and start breaking down waste on contact. **BIO-CLEAN** contains billions of bacteria and as they eat, they double in number every 30 minutes! Unrestricted by gravity, they spread through the entire plumbing system, devouring all the organic waste.

Waste accumulates in your pipes causing slow, or even clogged drains.

Within days **BIO-CLEAN** begins to eat through the gunk, restoring drain flow to full capacity.

Monthly **BIO-CLEAN** treatments will keep your drains clean and trouble-free.

BIO-CLEAN Septic Packets

A great way to get customers on an active monthly maintenance program.

Authorized by U.S.D.A for use in federally inspected Meat and Poultry Plants.

Why use **BIO-CLEAN** when there are already bacteria in my tank?

Although some bacteria are present in the waste these organisms do not work well on protein, fiber and grease. Furthermore, modern chemistry has provided us with advanced cleaning products made of complex molecules. Ordinary bacteria just can't break these chemicals down. Bio-Clean is specially formulated to bio-degrade ALL types of organic waste. Bio-Clean contains a larger quantity, a higher quality and a unique combination of ingredients not found in other septic tank products. In fact, Bio-Clean can even restore failing septic fields in most cases.

MULTIPURPOSE

- Residential and commercial applications
- All drain and sewer pipes, including:

Kitchen Sinks

Lavatories

Bath tubs

Showers

Floor drains

Laundry drains

Septic tanks and drain fields

Garbage disposal odors

Grease traps

Sewage ejector sumps

Outdoor outhouses and cesspools

R.V. & boat holding tanks

Lift Stations

Cat Litter Boxes

Another Industry First! Clean Gene® Refrigerator Magnet

Once a month his eyes light up and blink. This reminds your customers to use **BIO-CLEAN** every 30 days — for a dramatic boost in repeat orders.

BIO-CLEAN Mixing Cups

A plastic quart cup for easy mixing of **BIO-CLEAN**.
